Specifications

Description	Technical tubing
Material	Soft PVC
Approvals / Standards	

Colours

We will gladly have cover tubing, grip and handle sleeve solutions manufactured to customer specifications from plasticized PVC.

Grip sleeves and handle covers are a robust and resilient way of jacketing and protecting parts that are handled manually with great frequency. Such covers and sleeves are available in grooved, smooth, recessed and rough profiles. As required by the specific application, they can also be manufactured in a wide range of dimensions and sizes at different degrees of shore hardness.

What all such sleeves and tubes offered by BIT have in common are superior resilience and an exceptional haptic feel.

Do not hesitate and ask our sales team for a quotation that is perfectly tailored to your specific requirements!
